### Conflicts of Interest and Undue Influence

None of the researchers have any conflicts of interest in this study.

### Invitation to Participate

You are being invited to participate in a research study. This consent form, a copy of which you can download with this [link](#), is only part of the process of informed consent. If you want more details about something mentioned here, or information not included here, feel free to ask any of the people named above. Please take the time to read this document and any accompanying information carefully. It is very important that you understand:

- what is being asked of you,
- what the risks and benefits of participation are, and
- how the information you provide will be used and stored.

### Purpose of the Study

You are invited to participate in this research study about the perspectives of crop advisors in the Canadian Prairies and Ontario about cover crops. . We are hoping to learn about the perspectives of crop advisors on the current extent of advising about cover crops to farms in the Canadian Prairies and Ontario, why farms are using cover crops, any benefits and challenges of crop advisors to access information about cover crops, and identify what could increase adoption of cover cropping.

### Study Procedures

If you decide to take part in the study, you will be asked to complete an online survey through *Survey Monkey*. The survey should take about 15 minutes to complete.

### Study Risks

This survey is minimal risk, meaning that the risks are no greater than what you might encounter in your daily life.

### Study Benefits

There are no direct benefits to you by participating in this study, but we hope to learn more about your current practice when advising farms about cover crops so that future training

programs and information about cover crops can better address the needs of crop advisors in Ontario and the Canadian Prairies

## **Compensation**

There is no compensation for this study.

## **Confidentiality**

All the information you provide as a participant in this study is confidential which means we as researchers must keep it safe. We will do our best, however, it is not possible to guarantee absolute confidentiality. We will only share your personal information if required through court order or law.

## **Use and Storage of Information**

Your information will be stored on a secure platform approved by the University of Manitoba. The research team will see your individual responses but these responses will not be linked to any personal information (like email addresses). When we share the results of this study, we will combine everybody's responses. This means no one will see your answers. Survey responses will be kept indefinitely to compare to future agronomist surveys on cover crops. If you choose to provide your email address at the end of this survey, these will be kept to provide participants with a copy of the final report and then deleted.

## **Dissemination**

The study results will be shared through 1) a summarized report to be made available on the University of Manitoba MAKE website (<https://umanitoba.ca/agricultural-food-sciences/make>), the Grain Farmers of Ontario website (<https://gfo.ca/cover-crop-survey>), and by email if provided by participants; and 2) journal publications and presentations in relevant academic and extension fields.

## **Withdrawing.**

Your participation in this research study is voluntary. You may withdraw from the study for any reason by exiting the browser. . You do not have to explain why. You will not be penalized in any way. If you withdraw before the end of the survey, all of your responses will be destroyed and will not be included in the summary of survey results.

## **Summary of Results:**

A summary of the study results will be available by November 2026. If you wish to receive a copy by email, provide your email address at the end of the survey.

## **Questions or Concerns**

Designated University of Manitoba personnel may check that this study is being done safely and properly. To do this, they may review the research records.

This study has been reviewed and approved by a Research Ethics Board at the University of Manitoba. However, this does not mean that participation is risk-free.
